

ROLL 700 L
 (Ref. TC700)

		
	SPECIFICATIONS	
	External dimensions	736 x 954 x 1767 mm
	Interior dimensions	600 x 800 x 1450 mm
	Matter	Galvanized metal
	Color	
	Weight	90 kg
	Useful volume	700 liters

CHARACTERISTICS

Insulated container designed for the transport and storage of fresh and frozen products.

- The **ROLL 700L** container is designed to offer maximum quality for fresh and frozen goods during their transport, while optimizing space inside the vehicle.
- It ensures a reliable cold chain to keep all the qualities and properties of transported goods intact.

- The insulated container **ROLL 700L** can be combined with a minimum of 2 x PL484 eutectic plates :

- > Cold negative eutectic plates (-18°C) = PL484-21°C (Ref. 350484-21)
- > Cold positive eutectic plates (+4°C) = PL484-12°C (Ref. 350484-12)

- Its frame and internal layout optimize air flow.
- The **ROLL 700L** container comes with individual ATP certification.
- We attach a standard RFID tag to all our containers.
- The frame is reinforced with galvanized steel.
